Issue #1 Spring 2009

We are very proud to bring you our NEW quarterly newsletter. Each edition will touch on a variety of subjects including tips to being safe on the roads, ways to reduce wear and tear on your vehicles, promotions, services staff updates and any other relevant information. Keep an eye out for it each quarter!!!

Message from the crew

We are proud to announce that we have just had our 3rd birthday at the end of July. Pirongia Action Automotive has been operating from our workshop for 3 years. We'd like to take this opportunity to thank our team and our loyal customers over the last 3 years.

Who's who at Pirongia Action Automotive

Grant & Colette Burr
Business Directors

Sara Breyley
Administration Manager

Robert McWha- Head technician, Thom Hesketh- Technician,
Michael Gawne- Technician

Seasonal Driving Tip

The biggest single vehicle factor influencing your fuel economy is under inflated tyres. Low tyre pressure increases rolling road resistance which means that your engine has to work harder to maintain the same speed. It's like riding a pushbike with flat tyres. The team at Pirongia Action Automotive can check your tyre pressures for you.

REMEMBER

For ALL your tyre needs contact Pirongia Action Automotive- Wide variety of new tyres, mags, puncture repairs, tubes.

Services Available

- WOFs
- Full range of Tyres at very competitive prices

- Child car seat checks and installation including anchor bolts & tether straps- to keep your little ones safe in your vehicle

Safe Driving Everyone

If you are driving during the day with your lights on, please ensure they are on DIP. It may be hard to believe but with your lights on full during the day you will still dazzle the driver of oncoming vehicles compromising their ability to drive safely.

Why Service Your Vehicle?

A regular service to your vehicle is a cost effective way to ensure your car is operating at its optimum. Oil itself doesn't wear out but the additives in your oil do so it is important to regularly replace your oil to protect your engine from premature wear and costly componentry failure. As well as lubricating all moving parts, your oil also helps to cool your engine, keep your internal engine components clean and

the additives in the oil help to keep your seals and gaskets supple. This helps to prevent oil leaks.

New oil can help to quiet noisy engines. Changing your engine oil regularly will also help to reduce harmful contaminate build up in your engine. At Pirongia Action Automotive you get more than just an oil and filter change.

The 19 points of service will be;

1. Change oil and oil filter
2. Replace fuel filter if it is due
3. Check and clean or replace air filter
4. Check transmission and differential oil levels
5. Lubricate steering/suspension/driveshaft where applicable
6. Check wiper blades, add windscreen washer additive and fill washer reservoir
7. Check brake fluid level and condition of brake fluid
8. Check power steering fluid level
9. Check radiator and cooling system hose condition
10. Check coolant condition and level
11. Check auxiliary drive belt condition and tension
12. Check battery electrolyte level and top up as required
13. While vehicle is on the hoist in the air, carry out general visual underbody inspection including brake components where visible, driveline, exhaust, CV and steering rack boots
14. Inspect tyres for damage and check tread depth. Inflate tyres to correct pressures including spare wheel
15. Spark plugs are checked
16. Check operation of all lights, windscreen wipers and washers
17. Door hinges and check straps are lubricated
18. Engine bay is steam cleaned and dried off
19. Vehicle is road tested

As you can see your vehicle gets a thorough check over. If any concerns are revealed on your vehicle we will discuss our findings with you and formulate a repair plan that best suits you to rectify the faults.
