

Services Available

- WOFs
- LARGER range of Tyres at very competitive prices
- Computerised full 4 Wheel Alignment service
- Batteries- we have really good batteries...and better batteries
- Same day Vehicle Servicing
- Diagnostic scanning equipment- to help identify electrical faults
- Tractor servicing & repairs- we can come to you
- Light Engineering- ask us about trailer repairs, farm gates, farm equipment
- On-site (farm) engineering/ welding- to check & repair all your farm machinery, cowshed pipework and gates or modify your cowshed yards to improve cowflow.
- Automatic transmission servicing- prolongs the life of your transmission, saving you \$\$\$\$.
- Air conditioning checks & servicing by mobile specialist- to keep you cool in summer
- Pre-purchase inspections- to highlight any hidden surprises
- Vehicle inspection reports- to identify if any finance is owed on the vehicle
- Child car seat checks and installation including anchor bolts & tether straps- to keep your little ones safe in your vehicle

Our Promise

If you want a workshop you can trust, the highest quality of repair on almost any vehicle, at a fair rate, your car repaired on time and service with a smile, then choose Pirongia Action Automotive.

Our motto- "We do it all".

Our Guarantee

That we will contact you if more work than anticipated is required.

That we can pick up and drop off your car within a 10km radius.

If we get parts or tyres for a special price, we pass the savings on to you.

To let you know about upcoming future repairs that we come across while working on your car.

If it's not sorted and it's our fault we will fix it at our cost.

Our workmanship.

Message from the crew

Sadly we have said "Goodbye" to Nic McMonagle. He has returned to the fairer shores of Duncan & Ebbett in Hamilton. We have loved having him for 2 years and wish him all the best with his future plans. We have been very lucky to take on Jarrod Mitchell who has hit the ground running this last month. Grant has been very busy with on-farm repairs. When our farmers have on-farm issues we try to be available ASAP as we understand it is a high pressure and very critical time of the year. Over the last few months Jason, Nic and Ash have been doing a great job keeping things ticking over at the workshop. Sarah, as always, has been a machine in the office, keeping everything on an even keel. We've had a lot of tyre sales recently. Also throughout Winter, there has been a steady sale of batteries. If you are aware that your battery is giving you a bit of trouble, come down to the workshop. We have a battery tester that can identify whether your battery needs replacing or not. This test will be done free of charge.

We are now on FACEBOOK- check it out and like us! 

Who's who at Pirongia Action Automotive

Grant & Colette Burr
Business Directors

Sara Breyley
Administration Manager

Jason Karauti
Service Manager/
Technician

Jarrod Mitchell
Automotive Technician

Ashleigh McMonagle
Apprentice Technician

Pirongia Action Automotive is now an Official Agent of Land Rover Spares - for all your Landrover requirements.

'Did you know' Tip

If you are a new client you may not realise that Grant is able to go on farm or on-site to do welding/ remedial engineering with his mobile truck. Feel free to contact him at the workshop to discuss your requirements.

Diesel fuel additives- Snake oil or not?

High tech common rail diesel injection systems are the norm with most vehicle manufacturers these days. These systems run extremely high fuel pressures and do not tolerate water or minute foreign particles. With moisture you also risk biological growth in your fuel tank as well which is also extremely harmful to common rail systems.

Sulphur, which is a high pressure lubricant, has been removed from diesel in New Zealand. New Zealand fuel, especially diesel is considered to be of inferior quality to that of the countries that have developed the common rail diesel injection systems. It seems that most of the diesel vehicle franchises in New Zealand recommend continual addition of fuel conditioner to your fuel tank if your vehicle has a common rail diesel injection system. One franchise in particular has their own additive which they recommend you use a whole container of additive with every tank of diesel.

From the start of May to the start of August, Grant and Colette have been trialing Hybrid Fuel Technology Fyrex CI diesel fuel treatment with excellent results. We have been recording fuel consumption/ km travelled. Grant's ute in particular, was doing 500-550km per 60 litres of fuel pre treatment and now is consistently doing over 600km per 60 litres while being treated. The best mileage recorded was 668km per 60 litres of fuel. After The initial treatment is 60mls of Fyrex CI added to your fuel tank and 30 mls every fill thereafter. A small treatment bottle costs \$17.40 incl GST and you get approximately 8 treatments per bottle. At roughly 400km extra km travelled per bottle that equates to about a 40L fuel saving. At \$1.57/L for diesel that gives you a saving of \$62.80 minus \$17.50 which gives you a nett saving of \$45.30. If you fill up every 2 weeks you can potentially save \$1178.80 or more per year. We also feel we get an increase in engine power, cleaner exhaust emissions with significantly reduced diesel particulates/ black smoke. Fyrex CI eliminates biological growth (Diesel Bug).

NOTE: At Pirongia Action Automotive we monitor your diesel fuel filters for the presence of Diesel Bug. This is identified as black sludge in your diesel fuel filter. It is claimed that Fyrex CI reduces engine wear, gives superior engine and fuel system protection, reduces CO2 and noxious emissions, gives maximum corrosion resistance, reduces fuel foaming and increases diesel storage life significantly. Fyrex CI burns ashless and does not contain minerals, metals or alcohol. We have had such a good result with HFT Fyrex CI that we have decided to retail the product to our customers and highly recommend all diesel vehicle owners to use it. We can also supply larger containers of Fyrex CI for bulk farm fuel tanks.

Safety Tip

We are now contacting clients with regard to their 6 Month Safety check. It's great to see there has been quite a lot of interest and clients are starting to bring their vehicles in for this service. We are charging \$40 for a full safety check- equivalent to a WOF safety check. We will identify, at this point, any wear or potential damage that may have to be addressed during the next 6 months, until your next WOF. This may save you money by getting onto issues before they create more damage and become much more expensive to fix.

For sale/Wanted to buy

Let us know if you have a vehicle for sale or you wish to purchase one. We have recently matched up several cars with new owners. We can also put your For Sale or Vehicle Wanted details on our notice board.

All new Maxxis AT980

Introducing the ALL NEW MAXXIS AT980 all terrain four wheel drive tyre. This is a serious true all terrain tyre, not like a lot of all terrain tyres that are designed for highway use. We have sold 11 sets of these tyres already and can personally endorse their EXCELLENCE! (Colly's Hilux 4x4). They are the Duck's Nuts!!!!

SAVE MONEY- CHECK TYRE YOUR PRESSURES

Check your tyre pressures PLEASE!!!!!! This is a simple task that will save you money by improving your fuel economy and creating less wear on your tyres. We can show you how to check your tyre pressures and give you the recommended pressure for the tyres on your vehicle. Different vehicles run at different tyre pressures. With the new 12 month WOF regime it is now more important that you, our customer, check your tyre condition (tread depth) more regularly as the Police will be clamping down on tyre condition more often in the near future. It is up to the vehicle driver to make sure the vehicle is up to WOF standards at all times.
